## Symbolic constellations & ritual prescriptions

The fascination of all forms of constellation work lies in its emotional impact on those involved and in drawing from an unknown knowledge in the constellation space. Emergence of feelings and temporary letting go of the

mind are usually invigorating - we feel more conscious and alive, regardless of whether we are setting up a topic ourselves, representative, group member or guide.

Almost every room in the constellation is a room of mindfulness and energy or of "knowing fields" that is used to work on a topic. Such spaces have a ritual character: they offer protection for basic feelings and deep knowledge. Is it possible that in such rooms individual desires are aroused that clarity and energy abundance are effective in everyday life in the long run? Or do they make us addicted to repeated "emotional baths" in seminars and thereby block practical changes in everyday life?

In our work we have observed how constellation work can also bring about sustainable and concrete, healing changes. On the one hand, it is beneficial to work with a clear picture of which elements (symbols / structures) the world is composed of (cosmology). On the other hand, the bridge to everyday life can be created by stimulating practical anchorages such as symbolic actions and rituals, with which those affected can independently bring about changes in their everyday lives.

**The seminar is aimed at** psychosocial counselors, organizational consultants, supervisors, constellation guides, coaches, energy practitioners as well as experienced representatives and psychosocial counselors (LSB) in training. It can be taken into account as advanced training and group supervision.

**The aims of the training are:** To show how analogue, shamanic and other indigenous high-quality media are helpful for constellations and how, on the other hand, "homework" can ensure the effectiveness of the constellation results in everyday life.

### Contents and practical constellation work in the seminar:

- Group constellations based on a cosmology (Sumerian vegetation cycle, Dagara cosmology, medicine wheel, cycle of basic feelings & hero's journey etc.) and creation of a common energetic space (community ritual)

- Differentiation and use of process symbolism (e.g. hero's journey, Tarot, cycle of basic feelings) and balance symbolism (e.g. Dagara cosmology) in the constellation work

### Cycle of basic feelings

(W.Machleidt, Grundgeföhle. H.&M.Weule, Die emotionale Organisation)

- Building bridges between analogue, shamanic, indigenous symbol work and Western cognitive reflection work in the setting of constellation

- Promotion of intuition and creativity and of the art of prescribing rituals based on the cases.
