In its 31st year:

Leitbild.
The fire
of desire

Already as children we know desire.

Desire for distance, for a beloved counterpart, for mountains or the sea, for action with joy, for community and much more.

It is in puberty, that we want to know more exactly, who we are: who am I? Where do I come from? What is my gift? And what is my purpose?

The heroes of magic tales follow in this period of life the call of their desire. Some ask the parents for their blessing and provisions for the journey, others find themselves in an emergency situation, all depart into the unknown. Like the fool in Tarot.

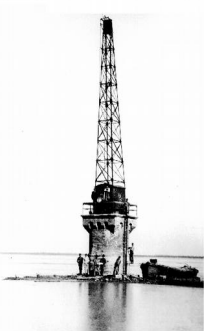

Nowadays the desire of youths is subject to the laws of economy flooding their desire with surrogates.

Yet here and then in our lives the call of our desire comes through. E.g., when the beauty of a moment is stirring our blood. E.g., when in a life transition ("crisis") old habits are irritated and new orientation is needed.

This call wants to make us aware, that a treasure wants to be hoisted. Which treasure? An image of our life vision or life purpose. We call it Leitbild. This image we are carrying inside of us. The fire of our desire is the impulse, to raise it into consciousness and to make it efficient in everyday life. When it makes sense and joy, what we do, we are able to start to love ourselves and others.

Who has the impression, that now time has come, to hoist that treasure, needs silence and vacancy, rest and leisure within a protected space. A space around a fire.

Since more than two decades we accompany people in this undertaking. Hereby is helpful, to look precisely on one's own life, to use silent and artistic media, to be on a place of power, in nature, to use symbol and ritual work. Sustaining in this are (male and female) midwives - that is how we understand our role - and people reinforcing us, to follow our inner image and to stay true to that orientation in difficult times as well.

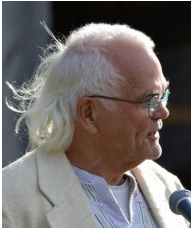

All seminars allowable for *Art of Counseling* and for *Art of Ritual*

A place of silence,

power and alignment especially for people from business world and city life with its high clock rates. Right in the middle of Upper Austria's Inn quarter, 50 km north of Salzburg, Mattighofen is situated. Close to the Kobernaussen forest there is the hamlet Unterweinberg in Schalchen. Populated by a lot of trees, the place Unterweinberg 59 houses a tipi, sometimes a sweat lodge, shrines in the tradition of the West African Dagara culture and a house with working room. A

good place for single work as well as for workshops.
